

Traffic Advisory – For Immediate Release Monday, September 23, 2019

Work begins on Bezanson Water Line

Construction begins tomorrow on the Hamlet's water distribution system.

The County invested \$110,000 in the project, which requires the use of heavy equipment and will involve several fenced-off open excavations over its three-week duration.

The County of Grande Prairie ask individuals to avoid the area for their own safety and to allow construction staff to undertake work smoothly.

This water line will connect the well adjacent to the Bezanson Fire Hall to the water treatment plant and in turn will supply the Bezanson community water system with another source well while suppling the firehall with municipal water.

We look forward to completing this community enhancement and thank you for your co-operation.
